

Steadfast Roofing are committed to protecting the environment by managing and undertaking all our operations in an environmentally responsible manner.

To will provide practical environmental care and strive to ensure all negative environmental impacts are avoidable and mitigated.

We will:

- Demonstrate compliance with all applicable environmental laws and / or regulations, national or industry standards or HSE requirements specified by our clients.
- Strive to improve our environmental performance through waste reduction, reuse, and recycling, as far as is practicable. Where further improvements are difficult, carbon neutral programs may be considered and implemented.
- Prevent pollution as a result of our operations, including the emission or transmission from our work sites of any noise, odour or atmospheric contaminant, which may unreasonably interfere with the health, welfare, convenience, comfort or amenity of any person.
- Not cause or allow serious or material environmental harm.
- Maintain the management system that is compliant with ISO 14001.
- Actively respond to and investigate all environmental incidents.

Steadfast Roofing will implement and maintain systems, inclusive of standards, policies and procedures which will be monitored regularly to ensure their integrity and effectiveness to facilitate continuous improvement.
