

Operation of Plant and Machinery Policy

Only specifically trained and competent employees holding a current licence will be permitted to operate machines such as elevating work platform, cherry pickers, and scissor lifts.

Additional licencing standards are required for operators performing high risk work which includes forklifts cranes and hoists. Where an employee is required to operate a forklift, a seat belt must always be worn by the driver.

Always check for the position of the controls before using machinery including the **emergency stop button**.

Make sure you have been specifically trained to operate any machine before using it never operate a machine or mechanical equipment without the proper authority.

Steadfast Roofing will carry out regular inspections and maintenance of plant and equipment to ensure that it is in good working order. When repair or maintenance work is carried out, the appropriate service record should be completed and maintained for future reference.

Never wear loose clothing or jewellery around machinery and ensure that guards and barriers are fitted correctly.
